

Rachel Zenzinger

"I will put partisan politics aside in order to ensure hard-working people have the freedom and opportunity to succeed!"

- ◆ **Economy:** We must focus on building a stronger middle class, with good paying jobs and a secure retirement. Only then will hard-working people have a fair shot at success.
- ◆ **Education:** All children should have access to high-quality schools, regardless of zip codes or parents' incomes. And we need to make higher education more affordable.
- ◆ **Equality:** Colorado should do more to help women receive equal pay for equal work. It's only fair that people who work hard and play by the rules have the same access to opportunity.

People in Arvada and Westminster know Rachel through her leadership in the State Senate and her years of effective service on City Council; but it's her background as a teacher, volunteer, and a mom that most inspired her to advocate for our community.

Dear Neighbor,

As a mother with two young children, trying to support my family in an older part of Arvada, I understand the hardship that Coloradans feel in the current economy.

It's time to choose leaders in our legislature who will give us some real results. Let's level the playing field for hard-working families who play by the rules. I would be honored to have your vote!

Rachel
